

## DAY 4:

I have created the process in that I have created the work flow, process builder and apex class  
and I have set the security and sharing rules for my process builder

and I have learnt the basics of apex and I have learnt about the permissions.

## DAY 4:

I have created the process in that I have created the work flow, process builder and apex class  
and I have set the security and sharing rules for my process builder

The screenshot shows the Salesforce Apex Classes setup page. The left sidebar contains a search bar with 'apex' and a list of items under 'Custom Code' and 'Environments'. The main content area is titled 'Apex Classes' and includes a 'Percent of Apex Used: 0%' status box. Below this is a table with one entry, 'ApplicationBatchTest', and a bottom status bar showing 'ENG US' and the date '25-01-2022'.

Apex Classes

Apex Code is an object oriented programming language that allows developers to develop on-demand business applications on the Lightning Platform.

**Percent of Apex Used: 0%**  
You are currently using 38 characters of Apex Code (excluding comments and @isTest annotated classes) in your organization, out of an allowed limit of 6,000,000 characters.  
Note that the amount in use includes both Apex Classes and Triggers defined in your organization.
